

Please do not enact proposal 02-278 or any other which would preempt Indiana's state Telephone Privacy laws in favor of a lower national standard. For the past year, the Indiana Telephone Privacy law has given me back my sanity by eliminating at least half a dozen unwanted telemarketer calls a day. One call center from Dade County Florida was calling me 3 times a day the last 2 months before the No Call List went into effect, and they would not stop calling no matter how angry or vehement I became with them.
